(54) Title: A METHOD AND SYSTEM TO PERFORM LOCALIZED ACTIVITY WITH RESPECT TO DIGITAL DATA

**WO 2006/028460 A3**

(57) Abstract: A system to perform localized activity with respect to digital data includes an interface component and an activity component. The interface component is configured to receive a marker location with respect to source digital data. The activity component is configured automatically to perform a parametrically-controlled activity with respect to the source digital data, based on an activity parameter. The activity component is further configured automatically to perform a parametrically-controlled selection of a selected portion of the source digital data, based on the marker location and a portion selection parameter, and to localize an effect of the parametrically-controlled activity to the selected portion of the source digital data.
